

Looking Ahead

June 5, 2017

Kyoto, Japan

Position & Name

- APLAC and PAC will be merged into APAC.
- No position at the committee level since PAC does not have a counterpart.
- After the discussion of some options last year, it was decided that PTC will be a sub-committee under the Technical Committee 2 (specific for laboratories and IBs).
- APAC/TC2/PTSC might be the right name.

Meeting Mode

- How to hold a meeting was a big concern.
- A short discussion was made with Brad.
- One option is to hold the meeting outside the TC2 plenary meeting and to report in TC2 meeting, mirroring the meeting mode of ILAC/AIC.
- This option can enable us to have more in-depth technical discussion.
- BOM/EC will make the decision.

Scale of PTSC

- Currently our APLAC/PTC has
 - ~40 members
 - 9 WGs
 - Produced 6 APLAC documents
- Next year, we will become PTSC under APAC/TC2.
- Compared to other SCs, we are bigger.

Best wishes
